

# Penske Online Payment System (POPS) Carrier Training

1/20/2015

# Overview

- The POPS application is designed for carriers/vendors to review and either approve or dispute their invoices for loads completed with Penske.
- The payment terms you have contracted with Penske, or with one of our customers directly, begins at first touch of the invoice within POPS. This "touch" date then becomes the invoice date.
- It is a requirement to access POPS and review and approve your invoices in order to receive payment.
- Payment will be issued by our corporate payables system on the scheduled due date. POPS functionality offers the ability for remittance level reporting. In addition, you will receive a regular remittance with your payment.
- If your company uses a *Factoring Company*:
  - You still need to register for POPS.
  - As the carrier of record, you are responsible to **review** the payment amount and **approve/dispute** each invoice.
  - Penske can set up the factoring company as the "Remit To" address upon receipt of an LOA (Letter of Authorization) signed by both your company and the factoring company.

- First step is to register your company on POPS. We will supply the registration link when you contract with Penske or our customer.
- You will receive an email (as the Vendor Administrator) asking you to set up a new password to go along with your user-id (also called your Penske SSO which will be your current email address unless you have an existing SSO id with Penske)
- Once you update your password and receive a confirmation email, you will be able to add additional users within the application
